Special Issue: Estimating uncertainty in soil models (Pedometrics '99)

Edited by I.O.A. Odeh and A.B. McBratney

Preface 1

Research papers

Geostatistical modelling of uncertainty in soil science
P. Goovaerts 3

Spatio-temporal modelling of the soil water balance using a stochastic model and soil profile descriptions
M.F.P. Bierkens 27

Predicting water table depths in space and time using a regionalised time series model
M. Knotters and M.F.P. Bierkens 51

Disaggregation of polygons of surficial geology and soil maps using spatial modelling and legacy data
E.N. Bui and C.J. Moran 79

Measuring the quality of digital soil maps using information criteria
T.F.A. Bishop, A.B. McBratney and B.M. Whelan 95

A possibility theory approach for estimating available water capacity from imprecise information contained in soil databases
D.R. Cazemier, P. Lagacherie and R. Martin-Clouaire 113

Combining pedotransfer functions with physical measurements to improve the estimation of soil hydraulic properties
B.J. van Alphen, H.W.G. Booltink and J. Bouma 133

A comparison of prediction methods for the creation of field-extent soil property maps
T.F.A. Bishop and A.B. McBratney 149

A rudimentary mechanistic model for soil formation and landscape development II. A two-dimensional model incorporating chemical weathering
B. Minasny and A.B. McBratney 161

Soil layer models created with profile cone penetrometer data
S. Grunwald, K. McSweeney, D.J. Rooney and B. Lowery 181

The surface fractal dimension of the soil–pore interface as measured by image analysis
A. Dathe, S. Eins, J. Niemeyer and G. Gerold 203

Research papers

Lateral podzolization in a sandstone catchment
M. Sommer, D. Halm, C. Geisinger, I. Andruschkewitsch, M. Zarei and K. Stahr 231

Identification of the spatial distribution of soils using a process-based terrain characterization
S.J. Park, K. McSweeney and B. Lowery 249

Present-day soil distribution explained by prehistoric land-use: Podzol–Arenosol variation in an ancient woodland in Denmark
S.M. Kristiansen 273

Mineralogical, chemical and charge properties of Geric Ferralsols from New Caledonia
T. Becquer, J. Pétard, C. Duwig, E. Bourdon, R. Moreau and A.J. Herbillon 291
Clay mineral transformations in soils affected by fluorine and depletion of organic matter within a time span of 24 years
M. Egli, A. Mirabella and P. Fitze 307
Forms of organic phosphorus in zonal steppe soils of Russia assessed by ^{31}P NMR
W. Amelung, A. Rodionov, I.S. Urusevskaja, L. Haumaier and W. Zech 335
